Abstract (Published Summary)

This document contains the description of the ANDANTE website, as it was published in 2021. The website will be one of the main communication channels for the project, so it has been designed to provide a comprehensive overview of the project, as well as details on the technologies, platforms and use cases in which ANDANTE focuses its activities. The website is intended to be a living communication tool and is therefore intended to receive periodic updates as news, newsletters and project results are produced by the project.
