Abstract (Published Summary)

This deliverable D6.19 “Final plan for use and dissemination of results” aims to provide the exploitation and business plans of the results obtained by each industrial partner in ANDANTE. Moreover, all partners, after assessment results, also indicate how they will disseminate, protect, transfer, and exploit their results.

This deliverable is the main result of Task 6.3 “Exploitation of ANDANTE results and business plans” in the WP6 “Project Management, Dissemination and Exploitation”.

This document is organized as follows:

- First, it presents the overall objectives, concepts proposed, major expected outcomes and innovations from ANDANTE as described in the grant agreement.
- Secondly, a description of the current situation regarding the results obtained in each WP is given as well as their planned roadmap.
- Third, this deliverable describes for each partner its main activities according to the type of organisation: Large Enterprise (LE), Small Medium Enterprise (SME), Research and Technology Organisations (RTO), and Universities. This description includes their current results in ANDANTE, their exploitable foreground, potential patents, and other exploitation IPRs.
- Fourth, this document presents the market analysis by partner. This analysis includes the market segment addressed by each partner, what are the limitations of existing products in this market, the advantages of their solutions, and what is their positioning in the market in relation to the outcomes obtained in ANDANTE. To define the market position and the adequate business model, each partner carried out a SWOT and a risk analysis.
- Fifth, each partner presents what is its exploitation strategy planned for its/their future product(s) resulting from the results of the ANDANTE project.
- Finally,
- The last two sections concern:
 - The dissemination section, partners list all their publications: articles, section of a book, exhibition, workshop, conference, thesis, etc.
 - The Impact section is very important because it allows each partner to explain the impact of their results in the ANDANTE project.
